

 **TRANS-AUTO AB**

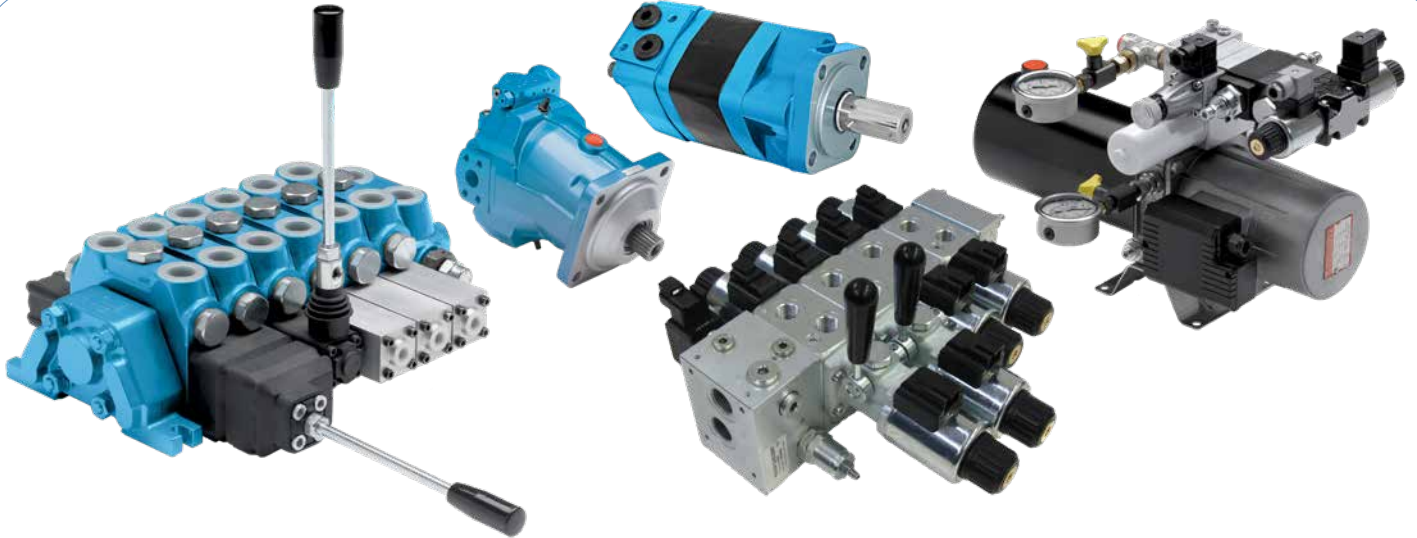

HYDRAULIC COMPONENTS

In the product group HYDRAULIC COMPONENTS you will find gear pumps, piston pumps, hydraulic motors, directional valves, auxiliary valves, mini power packs.

We offer complete customized solutions and component sales. If you want separate product technical sheets you can find it on our website or contact our customer support..

BREVINITM

Motion Systems

COOLERS

In the product group COOLERS you will find AC coolers, DC coolers, hydraulically driven coolers, combination coolers, water coolers, accessories etc.

We offer complete customized solutions and component sales. If you want separate product technical sheets you can find it on our website or contact our customer support.

INLINE FILTERS

In the product group INLINE FILTERS you will find low pressure and return line filters, medium pressure filters, high pressure filters, automatic filter, air breather filters, accessories etc. We have exchange filterelements for most filterbrands in the market. We offer complete customized solutions and component sales. If you want separate product technical sheets you can find it on our website or contact our customer support.

OFFLINE FILTERS & CLEANUP SYSTEMS

In the product group OFFLINE FILTERS & CLEANUP SYSTEMS you will find, among other things, stationary filter units, filter carts, deep filtration for diesel, hydraulic oils, transmission oils, lubricating oils, accessories etc. We offer complete customized solutions and component sales. If you want separate product technical sheets you can find it on our website or contact our customer support.

DIAGNOSTIC INSTRUMENTS & LOGGERS

DIAGNOSTIC INSTRUMENTS & LOGGERS. Here you will find, among other things, electronic measuring instruments and loggers for measure pressure, flow, temperature, RPM, etc. The product portfolio contains step in instruments 2-3 channel logs up to more advanced instruments with analog, frequent and CAN BUS setups. The instruments comes always with analysis reporting software. We offer customized system solutions and component sales. If you want a product technical sheet, you will find it on our website or contact our customer support.

ANALOG & DIGITAL GAUGES, TESTKITS

In the product group ANALOG & DIGITAL GAUGES, TEST KITS you will find, standard analog gauges dia 63mm, analog gauges dia 100mm, digital gauges dia 80mm, standard test kits, customized test kits, customized and application combination test kits, accessories etc.

We offer complete customized solutions and component sales. If you want separate product sheets you can find it on our website or contact our customer support.

MINIMESS TESTVALVE AND ACCESSORIES

In the product group MINIMESS WITH ACCESSORIES you will find among others test valves, gas valves, vent valves, standard testhoses, customized testhoses and a large accessory program. We offer complete customized solutions and component sales. If you want separate product technical sheets you can find it on our website or contact our customer support.

TEST- AND CHARGINGKIT FOR GAS ACCUMULATORS

In the product group TEST AND CHARGING KIT FOR GAS ACCUMULATORS you can find charge- and test equipment for the most common accumulator brands in the market. Everything from simple kits to advanced universal kits, supplemented with adapters. The range contains also hoses for high pressure and accessories etc. We offer complete customized solutions and component sales. Product technical sheets can be found on our website or contact our customer support.

OIL AND DIESEL FUEL ANALYSIS INSTRUMENTS

In the product group OIL AND DIESEL FUEL ANALYSIS INSTRUMENTS you will find electronic measuring instruments for measuring solid particles- and watercontamination, oil status "Oil Condition" etc. The productrange contains simpler instruments to more advanced realtime ROT analysis combinations. We offer complete customized solutions and component sales. If you want separate product technical sheets you can find it on our website or contact our customer support.

WIRELESS MONITORING- AND DIAGNOSTICS SYSTEMS

In the product group WIRELESS MONITORING- AND DIAGNOSTICS SYSTEM you will find, among other things, cost effective gateways for GSM 4G, with associated cloud-based analysis- and monitoring software. Can also be connected to external cloudbased platforms and PLC / BIM systems. The information is reported in real time with history and alarm functions. We offer complete customized solutions and component sales. If you want separate product technical sheets you can find it on our website or contact our customer support.

SMART SENSORS FOR OIL CONDITION MONITORING

In the product group SMART SENSORS FOR OIL CONDITION MONITORING you will find electronic sensors for measuring solid particles contamination, water contamination, Oil Condition status etc. The program contains sensors for analog, frequency and CAN BUS setups. The sensors are available for fixed and mobile installations and can easily be connected to existing process systems or alternatively our own cloudbased platforms. We offer complete customized solutions and component sales. You can find separate product sheets on our website or contact our customer support.

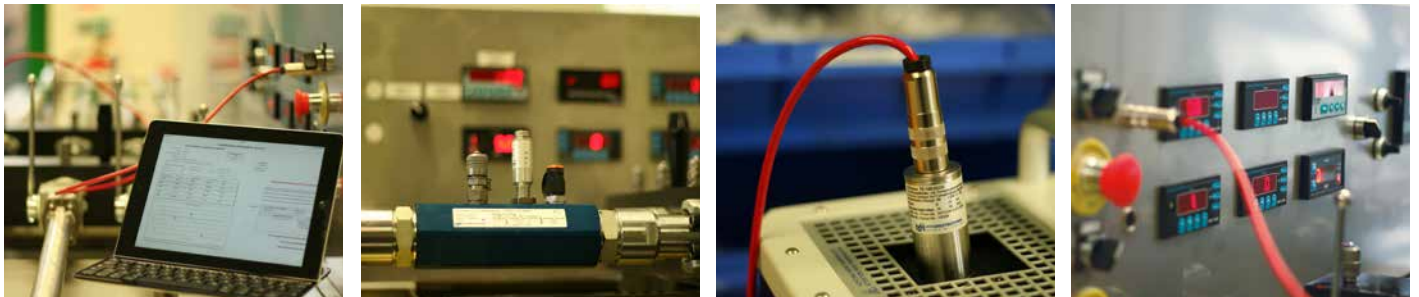

PRESSURE-, TEMPERATURE-, LEVEL-, FLOW

In the product group PRESSURE-, TEMPERATURE-, LEVEL-, FLOWSENSORS you will find electronic sensors for measuring pressure, temperature, level, level/temp, flow etc. With and without display function. The program contains simpler to advanced combinations for analog, frequency, IOT and CAN BUS SAE1939 setups. We offer complete customized solutions and component sales. If you want separate product technical sheets you can find it on our website or contact our customer support.

Your "One Stop Shop" for ... Calibration and Repair

Trans-Auto offers reliable, accurate and efficient calibration- and repairservices. All our services are competitive with fast deliveries and costeffective prices.
